Date: _____

Dear Doctor:

_____ has presented for dental treatment to our office.
An examination has disclosed the need for the following procedures:

- Routine dental treatment including scaling and cleaning.
- Extraction and/or other surgical procedures (i.e. periodontal surgery).
- Crown and bridge work involving lengthy appointments of one hour or more.
- Use of 2% lidocaine with epinephrine.

Are there any contraindications to these treatments in light of patient's history of:

- Heart murmur of mitral valve prolapse
- Rheumatic fever or rheumatic heart disease
- Hypertension Diabetes Hepatitis(please specify type)
- Other:

Please provide the following information:

- Are there any precautions to be followed?
- Is there a need for antibiotic prophylaxis?
- List of current medications
- Most recent laboratory results
- Other

Sincerely,
